

# ARTEMISIA (WORMWOOD)

**Location:** Zone 3, sun, well-drained soil

**Shape:** Mounded

**Foliage:** Fern-like, silver

**Flowers:** Insignificant

**Notes:** Certainly one of the most popular of foliage perennials, this forms a low cushion of ferny, silvery-grey leaves. Good for hot, dry sites. Nice edging plant, also combines well with other perennials in containers.

## **Silver Mound**

*Artemisia schmidtiana* 'Silver Mound'

12" x 18"

Full Sun

Zone 3

Low cushion of silvery, fern-like foliage does best when cut back in midsummer to maintain its dense, mounded form. Tolerates heat and drought.
