

GERANIUM (CRANESBILL)

Location: Zone 3-4, sun to part shade, well-drained soil

Shape: Mounded

Foliage: Medium to dark green

Flowers: Summer

Notes: Some varieties have red tinged fall foliage. Good border and edging plants. With the more vigorous of plants, after blooming, a light shearing will bring on a second flush of bloom later in the fall.

Bevan's Variety *Geranium macrorrhizum* 'Bevan's Variety'

10-15" x 18-24" Sun/part shade Zone 3

Spreading mound of large fragrant green leaves, bearing deep pink flowers in early summer. Drought and heat tolerant.

Biokovo *Geranium cantabrigiense* 'Biokovo'

12" x 18" Sun/light shade Zone 4

Flowers are white to light pink with red sepals and bloom from June to August. Green foliage is fragrant and heavily lobed and forms a dense mound.

Dark Reiter *Geranium pratense* 'Dark Reiter'

8-10" x 12" Sun/part shade Zone 4

Forms a compact mound of dark purple, finely-cut foliage. Lilac-blue flowers bloom from June to August. Prefers well-drained soil.

Max Frei *Geranium sanguinem* 'Max Frei'

12-18" x 12" Sun/part shade Zone 3

Dense mound of purple-pink flowers bloom from June to August. Dense mound of heavily lobed, dark green foliage turns crimson in fall. Prefers well-drained soil.

Rozanne *Geranium* x 'Rozanne' PP 12,175

18" x 18-24" Sun/part shade Zone 4

From May through October, cup shaped, blue-violet flowers cover the sprawling mound of foliage. Leaves are green with chartreuse marbling. Does best in well-drained soil.
