

HIBISCUS

Location: Zone 4, sun, rich, moist, soil

Shape: Upright, rounded, bushy

Foliage: Green or Burgundy

Flowers: Summer to Fall

Notes: Hibiscus prefer full sun and good air circulation. Plant in consistently moist, well-drained soil. May be slow to emerge in spring, gaining vigor with hot weather. Mulch in winter for best results.

Airbrush Effect *Hibiscus 'Airbrush Effect' PP 29,295*

42-48" x 48-54" Sun/part shade Zone 4

Flowers are vibrant pink with a salmon hue and a white halo around a dark red eye. Blooms July through September on an upright, mounded bush. Plant in moist, well-drained soil.

Cranberry Punch® *Hibiscus moscheutos 'Whit XX'*

24-36" x 24-36" Full Sun Zone 4

Dark red flowers bloom all summer. Deep green, red-veined leaves form a tidy, compact, dense mound. It is heat and drought tolerant.

Cristi™ *Hibiscus moscheutos 'Cocker' PPAF*

48-72" x 36-48" Full Sun Zone 4

Huge ruby red flowers bloom from August to September on a bushy, rounded form. Tolerant of urban conditions. Late to break bud, typically in June.

Kopper King *Hibiscus 'Kopper King' PP 10,793*

36-48" x 36-48" Full Sun Zone 4

Huge, light pink flowers with a red eye and veins bloom from July to August. Foliage is copper red in color and contrasts nicely with flowers. Slow to emerge in spring.

Midnight Marvel *Hibiscus 'Midnight Marvel' PP 24,079*

46-48" x 52-54" Full Sun Zone 4

Deep wine-purple, maple-like foliage is combined with 8-9" scarlet red flowers from mid-summer into early fall. Late to emerge in spring, but catch up quickly.

HIBISCUS

Starry Starry Night

Hibiscus 'Starry Starry Night' PP 27,901

42-48" x 42-48"

Full sun

Zone 4

Large, light pink flowers with dark pink veining. Blooms from July through September. Foliage is lobed and almost black in color.
