

Physostegia (Obedient Plant)

Location: Zone 2, sun, well-drained soil, tolerates wet or dry soil

Shape: Clumping

Foliage: Dark green

Flowers: Summer into fall

Notes: Obedient plant is a clump-forming native perennial that grows aggressively. From midsummer to early fall, spikes of purple, pink and white flowers rise above sharply toothed leaves.

Crystal Peak White • *Physostegia virginiana* 'Crystal Peak White'

14-18" x 18-24" Sun/part shade Zone 3

White flower spikes bloom from July to September. Dark green, deeply toothed foliage grows in an upright, compact mound. Tolerates wet sites.
