

Spruce

Baby Blue Eyes • *Picea pungens* 'Baby Blue Eyes'

18-20' x 8-10' Full Sun Zone 3

Broad, pyramidal form that does not require pruning. Striking silvery-blue foliage is resistant to needle cast. Very slow growing, only 2-3" per year. Prefers rich, well-drained soil.

Bird's Nest • *Picea abies* 'Nidiformis'

3' x 2-3' Sun/light shade Zone 3

Tight, many layered branches create nest-like compact form with light green needles. Versatile, cold hardy, and requires little maintenance. Japanese Beetle resistant.

Black Hills • *Picea glauca densata*

25-35' x 20-30' Full Sun Zone 3

Upright pyramidal to dense symmetrical cone shape with bright-green needles that mature to an interesting blue-green. Shears easily and is useful as a specimen, hedge, or wind-break.

Blue Totem • *Picea pungens* 'Blue Totem'

12-15' x 2-3' Full Sun Zone 3

Branches fork upwards at a sharp angle, creating a very tight, narrowly upright growth habit. Vivid powdery blue needles remain bluish-green throughout the winter. Low maintenance and deer resistant.

Bonny Blue • *Picea pungens* 'Bonny Blue'

25-30' x 15-20' Full Sun Zone 2

Beautiful short blue needles stand out on this perfectly shaped, slow growing spruce tree. It has a strong central leader and a pyramidal form. Foliage remains silvery-blue throughout the winter.

Candlelight • *Picea glauca* 'Candlelight'

5-6' x 3-4' Full Sun Zone 3

Dwarf, cone-shaped form with a golden flush of new growth in the summer that resembles a candle flame. Drought tolerant once established. Heat and wind tolerant; shows good resistance to verticillium wilt. Deer and rabbit resistant.

Spruce

Colorado • *Picea pungens*

40-60' x 15-30' Full Sun Zone 3

Symmetrical, pyramidal form with rigid tiered branches densely covered with stiff gray-green to blue-green needles. Excellent as a specimen, hedge, or windbreak. Likes fully exposed, well drained locations.

Cupressina Norway • *Picea abies* 'Cupressina'

20-30' x 8-10' Sun/part shade Zone 4

A narrow, pyramidal selection of Norway Spruce with a dense growth habit. Needles are dark green year round. Branches are strong enough to handle heavy snow without breaking. Shows good deer resistance.

Dwarf Alberta • *Picea glauca* 'Conica'

5-6' x 3-4' Sun/part shade Zone 4

A perfect cone shaped dwarf conifer with dense gray-green needles. Excellent as a container plant or miniature Christmas tree. Needs some winter protection in zone 4 in exposed areas.

Dwarf Blue Globe • *Picea pungens* 'Globosa'

3-5' x 5-6' Full Sun Zone 2

Dwarf, flat-topped, densely branched globe with bright blue needles all year but are brighter in summer. A unique accent for that special spot. Available in shrub form or grafted onto a standard.

Dwarf Norway Globe • *Picea abies* 'Pumila'

3-4' x 3-4' Sun/part shade Zone 3

Attractive, broad globe with interesting light to dark green needles covering dense branches. Spreading habit useful as an informal hedge or landscape accent. Does well in colder climates.

Fastigiata Colorado Blue • *Picea pungens* 'Fastigiata'

12-15' x 4-6' Full Sun Zone 3

Powdery blue foliage on an upright, narrow, columnar habit when young but becomes more broadly pyramidal over time. Branches can be kept tight with shearing.

Spruce

Fat Albert • *Picea pungens* 'Fat Albert'

30-40' x 18-20' Full Sun Zone 3

Growth habit is similar to a Colorado Blue Spruce with more consistent blue coloring. When young, it can appear very wide and rounded. Prefers rich, moist soil.

Meyeri • *Picea meyeri*

40-50' x 15-20' Sun/part shade Zone 4

More disease resistant and versatile spruce tree with dense, green to blue needles and a symmetrical, upright pyramidal form. It has a medium growth habit and is tolerant of urban locations and dry conditions.

North Star • *Picea glauca* 'North Star'

8' x 5' Full Sun Zone 3

Compact tree with a dense habit and the classic pyramidal form with longer, medium-green needles. Has good resistance to winter wind and sun burn. Faster growth rate than other dwarf varieties.

Norway • *Picea abies*

60-80' x 25-30' Full Sun Zone 2

A large, pyramidal spruce with slightly upturned primary branches and slightly weeping secondary branches. Needles are deep green and four sided. Established trees are drought tolerant and deer resistant.

Sester's Dwarf • *Picea pungens* 'Sester's Dwarf'

5' x 4' Full Sun Zone 2

Stunning blue needles, slow growth rate, and classic conical form make this dwarf spruce an ideal plant for the modern landscape. Excellent as a specimen for small landscapes. Very cold hardy.

Sherwood Compact • *Picea abies* 'Sherwood Compact'

8-15' x 5-8' Sun/part shade Zone 4

Upright, pyramidal, dwarf Norway selection with green needles and light brown shoots. Ascending branch habit and a narrow, conical shape. New spring foliage emerges light green. Low maintenance.

Spruce

Skinny Blue Genes™ • *Picea glauca* var. *densata* 'Westervelt' PP 29,825

25' x 8' Full Sun Zone 2

Narrow, conical growth habit with rich blue needles. Tolerant of very cold conditions, as well as, drought and deer.

Weeping Norway • *Picea abies* 'Pendula'

5-12' x 4-6' Full Sun Zone 3

Height is dependent on training. Slow growing with pendulous branches. Excellent as a specimen or in rock gardens. The shape varies from tree to tree. Dark green needles year round. Drought tolerant.

Weeping White • *Picea glauca* 'Pendula'

20-30' x 4' Full Sun Zone 2

Narrow, upright, weeping habit that does not require staking to maintain its form. Dark blue-green to gray-green needles on the stiff, strongly weeping side branches give it a formal appearance. Very cold hardy.

Whiskey Blue Hills • *Picea glauca densata* 'Whiskey Blue Hills'

15-20' x 6-8' Sun/part shade Zone 2

Semi-compact, pyramidal form with very blue needles. Disease resistant and extremely cold hardy. This slow to medium growing variety reaches approximately 10' tall and 6' wide in ten years time.
