

Fir

Balsam

Abies balsamea
H: 45-60' W: 20-25'
Sun/part shade
ZONE 3

Upright, pyramidal form with flat, shiny, dark green needles with a strong Balsam scent. A favorite for Christmas trees, and provides shelter for birds and animals. Native.

Concolor

Abies concolor
H: 30-50' W: 15-30'
Sun/part shade
ZONE 4

Upright, densely conical with attractive, blue-green needles that curve outward and upward on branches and when crushed, emit a lemon scent. Tolerates drought, heat, and cold temperatures. Requires well-drained soil.

Piccolo Dwarf Balsam

Abies balsamea 'Piccolo'
H: 2-3' W: 2-3'
Sun/part shade
ZONE 3

Tiny, uniform, dark green needles radiate around the many short branches on this dwarf globe Balsam Fir variety. Plant in rich, acidic soil where it can be viewed up close.

Silberlocke Korean

Abies koreana 'Silberlocke'
H: 15-20' W: 10-15'
Full Sun
ZONE 4

This compact pyramidal Korean Fir has dark green needles that curl upwards to display the silvery white underside. Abundant purple cones are held upright along branches. Drought tolerant and deer resistant.

Tyler Blue Balsam

Abies balsamea 'Tyler Blue'
H: 15-18' W: 10-12'
Sun/part shade
ZONE 3

Lush blue foliage on a fairly compact, pyramidal form. Needles are soft and maintain their distinctively blue color in sun or part shade with well-drained soil. Slower growing, measuring 8-10' tall & 4-5' wide after 10 years.
